

## Science

Activity- Skeleton

### **What you will need;**

A piece of paper (black if you have it)

Cotton buds

Scissors

Glue

Pencils/ pens

### **Activity;**

1. Cut up some of the cotton buds you have so you have lots of different shapes and sizes
2. Think about which bones would be longer/ shorter. For example: would your shin bone be the same length as the bone in your finger?
3. Start to place the cotton buds on your piece of paper, make sure you use glue otherwise they will fall off.
4. Once you have the bones of the skeleton, can you now try and draw the skull?
5. **Challenge:** Can you label the different bones?

Don't forget to send a picture to your teacher!
