AAAAAND BREATHE...

We are all constantly breathing, but the way we do it can have a big impact on how we feel.

Looking at the painting below, try breathing in slowly for five seconds, and then out for five seconds. Do this for a whole minute.

**How are you feeling?
Have you noticed any changes?**

DISTRACTIONS THROUGH DOODLING

Doodling is a really great way of clearing your mind. It can enhance your creativity, relieve stress, improve memory, and keep you focused!

We've had a fun time filling this space with all our weird and wacky ideas.

Can you colour the lines and shapes in, and maybe even draw more of your own?

EXPRESSION THROUGH ART

Often, artists find that painting helps them to understand their emotions and choose a variety of shapes and colours to express themselves.

How are you feeling today? **Using the frame below, draw yourself and try to think of how you can show it.**

COLOUR WHEELS

Colour wheels help us to understand more about how colours interact with each other. There are three primary colours: red, yellow, and blue. Every other colour in the rainbow can be made using them. **Some of these colours have been filled in for you. Can you colour in the rest?**

ALL THE COLOURS OF THE RAINBOW

Some of our rainbows have lost their colour. Can you colour them back in?

PAINTER'S PALETTE

Artists use a paint palette to mix their colours before painting with them. It's a chance for them to explore different shades and tones. Some might see the palettes as a piece of art themselves! **Use the palette below to prepare your very own masterpiece.**

KALEIDOSCOPE OF COLOURS

What do different colours make you think of? Artists may choose a variety of colours to express their feelings. Blue might be calm, red could be angry, or perhaps green is serene? **Colour in the items below in a range of patterns and colours!**
