

**EYFS/KS1 Home Learning**  
**Great outdoors container challenge**  
**Activity 1**

**Things you will need**

- Containers from your home e.g. pots, Tupperware, boxes, bowl, cup. Try to use containers of all different shapes and sizes

All equipment can be swapped for something else that is similar based on what you have at home.

**Activity**

Have some fun in the great outdoors and practice your Maths skills!

This activity is designed to bring numeracy into your outdoor spaces and focuses on measuring through play. Please encourage the pupils to collect their own equipment where possible.

1. Collect some containers from your home of different shapes and sizes. These can be anything, for example a pan, a cup, a bowl etc.
2. Go outside into your garden/ local park/green spaces and get collecting the natural objects around you to fill up your different containers.

3. Notice how some containers need more objects to fill them and some need less. Can you fill some half way? Can you fill them all with the same objects to see which needs the most to get to the top?
