

## Key Stage 2 Home Learning Outdoor Learning Activity: Outdoor Material Collage

The aim of this activity is to make a collage from using natural materials from outdoors. You may wish to find materials such as leaves, branches and flowers from your garden, yard or local park. Once you have collected all your natural materials try to arrange them on a large piece of paper or card and if possible glue them down. You can arrange them to look like anything you like, you may choose to create a woodland, character or any other piece of artwork.
