

KS2 Home Learning Project

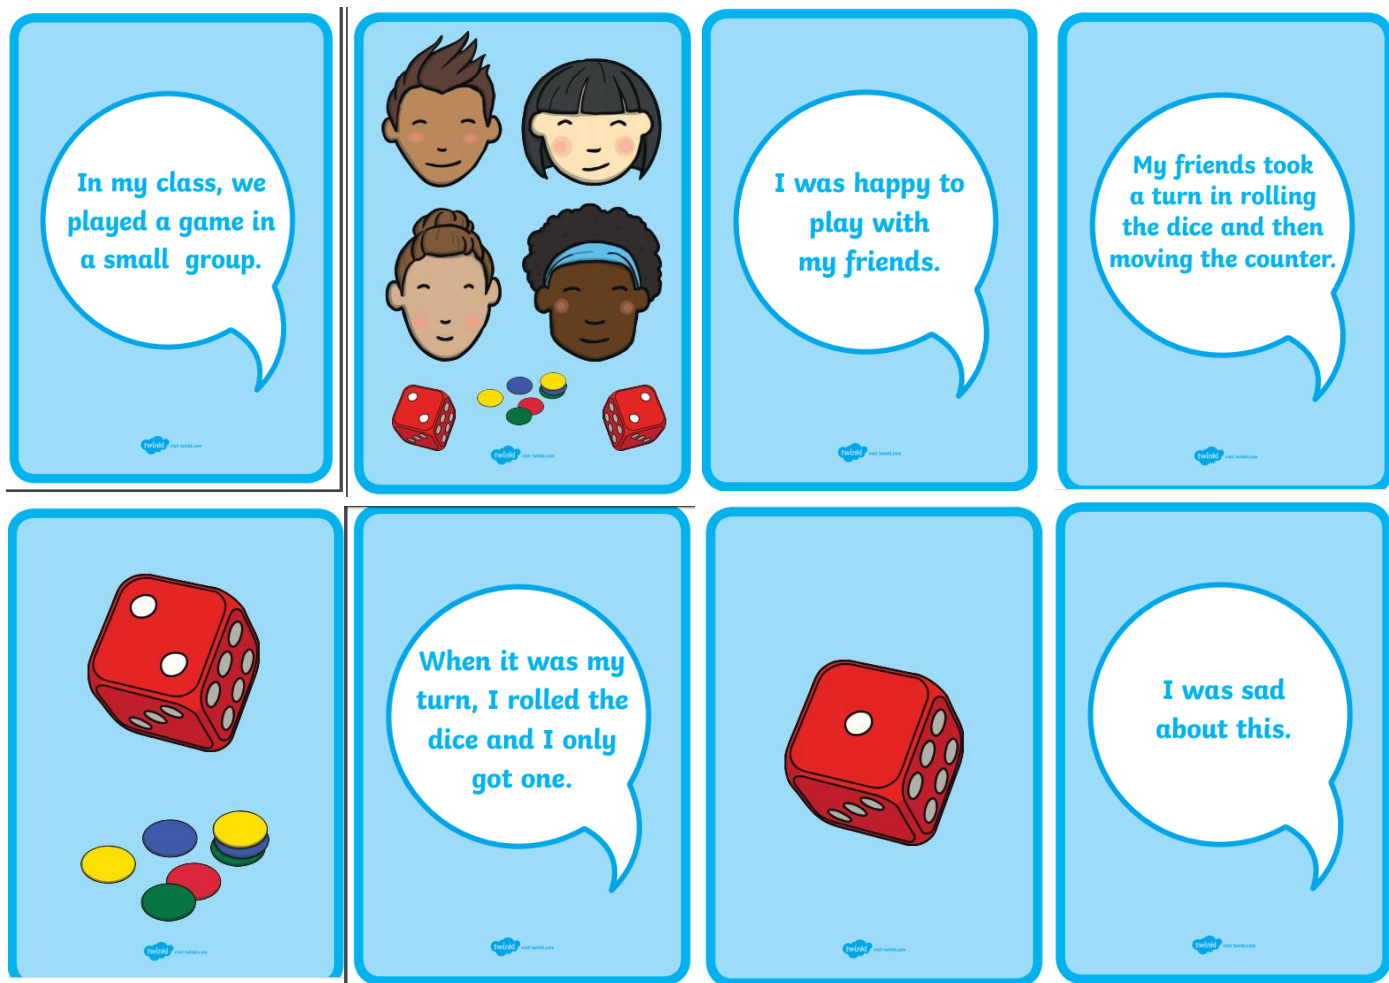

Turn Taking visuals and social story

Below is a very useful and fun visual which will chose who is next. This can be useful in both the classroom and at home when taking part in an activity or game.

How does this resource excite and engage children's learning?

A set of A4-sized prompt cards demonstrating a social situation of how to take turns. A great tool for teaching social skills to children with special educational needs. It makes the child aware of what is happening before during and after a game or activity.

But my friends had also rolled low and they didn't mind.

I know that I will have another turn like my friends.

Is it my turn again?

So I will sit nicely like my friends.

Oh, it's my turn again.

I am really enjoying sharing!
