

KS2 Home Learning

Messy Play Activity 9

Things you will need

- 1l or bigger Plastic drinks bottle thoroughly cleaned
- Soil, Compost and Sand (you don't need large quantities of any of these)
- Worms from the garden
- Scissors

Activity

1. Dig for some worms (handy hint, if the soil is dry, water the garden and come back a few hours later so the worms will be closer to the surface).
2. Cut the top off the plastic bottle using the top as a handle funnel to pour in the soil.
3. Add the worms – place them on the top and as the soil is loose you will see them slowly disappear into the soil.
