## FOR PARENTS/CARERS OF DIRECT CLOSE CONTACTS OF COVID-19 at ALS

Dear Families

### Ref: Advice for your child to self-isolate for 10 days – ZONE 2

I write to advise you that, regrettably, a student in Zone 2 has developed symptoms of Covid-19 and your child has been in close direct contact with the student yesterday.

In line with the national guidance, we recommend that your child now stays at home and self-isolates until we receive a confirmation from the symptomatic student's PCR test. We will keep you updated, however, if the PCR test is positive, your child will need to self-isolate up to and including Thursday 1 July 2021.

Tomorrow all learning will take place remotely and log on details will be sent to you in due course.

Please be advised transport has been cancelled, however, considering the late notification you may wish to contact your transport provider to confirm this also.

We are asking you to do this to reduce the further spread of COVID-19 to others in the community.

We will write to you again this week, to clarify the impact of the decision to close the Zone on your child's end of term educational programme.

Yours faithfully

Mrs A Hildrey  
Headteacher
